

Pocket Anesthesia Pro

Productivity and Return on Investment

Pocket Anesthesia Pro offers you state-of-the-art charge capture technology designed for point of service capture of all information needed for anesthesia billing.

It is a better system than the one you're using now.

How much better? One of our clients – Anesthesia Associates of Rochester, New York – decided to find out. The results?

- *Faster Submission of Claims:* The people at Anesthesia Associates of Rochester were able to quickly process claims using **Pocket Anesthesia Pro** – in every case, **Pocket Anesthesia Pro** claims were ready for submission the day after surgery.
- *Faster Reimbursement of Claims:* Anesthesia Associates of Rochester enjoyed a 15% increase in cases where fees were collected within 30 days of performance of the case, and a seven-fold increase in the number of cases where fees were collected during the same calendar month that the case was performed.

“**Pocket Anesthesia Pro** has made it easier for us to code procedures, enter charges and submit claims,” says Sally J. Siegl, Practice Administrator at Anesthesia Associates of Rochester. “Our claims are paid more quickly, and our gross collections have increased as well. We love this system, and would never go back to paper charge entry.”

Experience the difference for yourself. Contact us at 310-275-5717 or at info@medelix.com for a demonstration of our charge capture technology.
